For decades, Maschinenbau Lohse GmbH has been supplying fixtures, apparatus, vessels and ventilators for the paper and waste disposal industries.

As a supplier to the paper industry we have gained enormous experience in the problems of wear during many years of close cooperation with our customers. The knowledge thus gained has enabled us to supply the optimum and consequently most cost-effective solutions to the various problems of wear.

Our own design department and modern mechanical processing department with extensive machinery resources are the guarantees for a fast, flexible and reliable processing of the jobs.

The following repair and maintenance work will be performed for the paper industry:

- any type of pulper
- vibration screens
- perforated sheets with and without carrier frames
- breaker rotors
- helical breakers
- any sorting machines and sizes including basalt linings
- screening and soaking drums
- centricleaners
- heavy-item collecting bin on pulper
- components for pressurised belt filter
- steel and stainless steel structures
- fans
- pressure worms
- various grades of hard coatings

In addition, we perform the following subcontract work:

Design, cutting, rolling, edging, welding, locksmith work, grit-blasting, pickling, turning, milling, drilling, punching, etc.
Range of assembly work.
